

present a danger of tripping and falling. For example, broken or missing steps or loose boards are unacceptable.

(v) Elevators must be working and safe.

(h) *Interior air quality*—(1) *Performance requirement.* The dwelling unit must be free of pollutants in the air at levels that threaten the health of the occupants.

(2) *Acceptability criteria.* (i) The dwelling unit must be free from dangerous levels of air pollution from carbon monoxide, sewer gas, fuel gas, dust, and other harmful pollutants.

(ii) There must be adequate air circulation in the dwelling unit.

(iii) Bathroom areas must have one openable window or other adequate exhaust ventilation.

(iv) Any room used for sleeping must have at least one window. If the window is designed to be openable, the window must work.

(i) *Water supply*—(1) *Performance requirement.* The water supply must be free from contamination.

(2) *Acceptability criteria.* The dwelling unit must be served by an approvable public or private water supply that is sanitary and free from contamination.

(j) *Lead-based paint performance requirement.* The Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4821-4846), the Residential Lead-Based Paint Hazard Reduction Act of 1992 (42 U.S.C. 4851-4856), and implementing regulations at part 35, subparts A, B, M, and R of this title apply to units assisted under this part.

(k) *Access performance requirement.* The dwelling unit must be able to be used and maintained without unauthorized use of other private properties. The building must provide an alternate means of exit in case of fire (such as fire stairs or egress through windows).

(l) *Site and Neighborhood*—(1) *Performance requirement.* The site and neighborhood must be reasonably free from disturbing noises and reverberations and other dangers to the health, safety, and general welfare of the occupants.

(2) *Acceptability criteria.* The site and neighborhood may not be subject to serious adverse environmental conditions, natural or manmade, such as dangerous walks or steps; instability;

flooding, poor drainage, septic tank back-ups or sewage hazards; mudslides; abnormal air pollution, smoke or dust; excessive noise, vibration or vehicular traffic; excessive accumulations of trash; vermin or rodent infestation; or fire hazards.

(m) *Sanitary condition*—(1) *Performance requirement.* The dwelling unit and its equipment must be in sanitary condition.

(2) *Acceptability criteria.* The dwelling unit and its equipment must be free of vermin and rodent infestation.

(n) *Smoke detectors performance requirement*—(1) Except as provided in paragraph (n)(2) of this section, each dwelling unit must have at least one battery-operated or hard-wired smoke detector, in proper operating condition, on each level of the dwelling unit, including basements but excepting crawl spaces and unfinished attics. Smoke detectors must be installed in accordance with and meet the requirements of the National Fire Protection Association Standard (NFPA) 74 (or its successor standards). If the dwelling unit is occupied by any hearing-impaired person, - smoke detectors must have an alarm system, designed for hearing-impaired persons as specified in NFPA 74 (or successor standards).

(2) For units assisted prior to April 24, 1993, owners who installed battery-operated or hard-wired smoke detectors prior to April 24, 1993 in compliance with HUD's smoke detector requirements, including the regulations published on July 30, 1992, (57 FR 33846), will not be required subsequently to comply with any additional requirements mandated by NFPA 74 (i.e., the owner would not be required to install a smoke detector in a basement not used for living purposes, nor would the owner be required to change the location of the smoke detectors that have already been installed on the other floors of the unit).

[60 FR 34695, July 3, 1995, as amended at 61 FR 27163, May 30, 1996; 63 FR 23861, Apr. 30, 1998; 64 FR 26646, May 14, 1999; 64 FR 49658, Sept. 14, 1999; 64 FR 50230, Sept. 15, 1999]

§ 982.402 Subsidy standards.

(a) *Purpose.* (1) The PHA must establish subsidy standards that determine the number of bedrooms needed for

families of different sizes and compositions.

(2) For each family, the PHA determines the appropriate number of bedrooms under the PHA subsidy standards (family unit size).

(3) The family unit size number is entered on the voucher issued to the family. The PHA issues the family a voucher for the family unit size when a family is selected for participation in the program.

(b) *Determining family unit size.* The following requirements apply when the PHA determines family unit size under the PHA subsidy standards:

(1) The subsidy standards must provide for the smallest number of bedrooms needed to house a family without overcrowding.

(2) The subsidy standards must be consistent with space requirements under the housing quality standards (See § 982.401(d)).

(3) The subsidy standards must be applied consistently for all families of like size and composition.

(4) A child who is temporarily away from the home because of placement in foster care is considered a member of the family in determining the family unit size.

(5) A family that consists of a pregnant woman (with no other persons) must be treated as a two-person family.

(6) Any live-in aide (approved by the PHA to reside in the unit to care for a family member who is disabled or is at least 50 years of age) must be counted in determining the family unit size;

(7) Unless a live-in-aide resides with the family, the family unit size for any family consisting of a single person must be either a zero or one-bedroom unit, as determined under the PHA subsidy standards.

(8) In determining family unit size for a particular family, the PHA may grant an exception to its established subsidy standards if the PHA determines that the exception is justified by the age, sex, health, handicap, or relationship of family members or other personal circumstances. (For a single person other than a disabled or elderly person or remaining family member, such PHA exception may not override

the limitation in paragraph (b)(7) of this section.)

(c) *Effect of family unit size-maximum subsidy in voucher program.* The family unit size as determined for a family under the PHA subsidy standard is used to determine the maximum rent subsidy for a family assisted in the voucher program. For a voucher tenancy, the PHA establishes payment standards by number of bedrooms. The payment standard for a family shall be the lower of:

(1) The payment standard amount for the family unit size; or

(2) The payment standard amount for the unit size of the unit rented by the family.

(3) *Voucher program.* For a voucher tenancy, the PHA establishes payment standards by number of bedrooms. The payment standards for the family must be the lower of:

(i) The payment standards for the family unit size; or

(ii) The payment standard for the unit size rented by the family.

(d) *Size of unit occupied by family.* (1) The family may lease an otherwise acceptable dwelling unit with fewer bedrooms than the family unit size. However, the dwelling unit must meet the applicable HQS space requirements.

(2) The family may lease an otherwise acceptable dwelling unit with more bedrooms than the family unit size.

[60 FR 34695, July 3, 1995, as amended at 63 FR 23861, Apr. 30, 1998; 64 FR 26646, May 14, 1999]

§ 982.403 Terminating HAP contract when unit is too small.

(a) *Violation of HQS space standards.* (1) If the PHA determines that a unit does not meet the HQS space standards because of an increase in family size or a change in family composition, the PHA must issue the family a new voucher, and the family and PHA must try to find an acceptable unit as soon as possible.

(2) If an acceptable unit is available for rental by the family, the PHA must terminate the HAP contract in accordance with its terms.

(b) *Certificate program only—Subsidy too big for family size.* (1) Paragraph (b)
